

CASE STUDY

Accelerated Recovery with AuraWell: Transforming Acute Injuries

Challenge

Todd, a 55-year-old active individual while performing an exercise program of pushing a heavy sled across a flat surface felt immediate pain in his right calf. Acute injuries can strike unexpectedly, causing immediate pain and hindering daily activities. Todd, being unable to walk without pain, had to get a scooter for mobility.

Todd's goal was to find a solution for his Grade 2 Gastrocnemius strain and alleviate his pain to regain full weight-bearing capacity and mobility as quickly as possible.

Solution

AuraWell's groundbreaking neuromagnetic therapy facilitated his rapid recovery and enabled him to regain mobility and resume his active lifestyle.

AuraWell's innovative neuromagnetic therapy, specifically the PEMF (NOVA HD) with the butterfly coil, emerged as the breakthrough treatment for Todd's acute calf injury. By applying safe, non-invasive, and FDA-cleared neuromagnetic technology, AuraWell aimed to expedite Todd's recovery and alleviate his pain.

Results

- **Swift Pain Reduction:** After just one session of AuraWell's PEMF therapy, Todd experienced a significant decrease in pain levels from 7/10 to 5/10. Subsequent treatments further alleviated his discomfort, ultimately reaching a pain-free state in his right calf.
- **Enhanced Weight-Bearing and Mobility:** Within a span of two weeks, Todd progressed from being unable to fully weight bear on his right lower extremity to standing and walking without pain. With the help of AuraWell, he regained 100% weight-bearing capacity and resumed daily activities without limitations.
- **Expedited Recovery Time:** Traditionally, a Grade 2 Gastrocnemius strain can take 4-8 weeks to heal with conventional treatments. However, by utilizing AuraWell's PEMF therapy, Todd achieved a remarkable 90% improvement within just three treatments, effectively cutting his recovery time in half.
- **Improved Range of Motion:** Todd experienced restored dorsiflexion in his right ankle, allowing him to achieve a normal ankle range of motion without pain. This milestone further facilitated his ability to walk comfortably and engage in light to moderate exercise.

Within the first few months of working with Aura,
we were able to:

Decrease Pain
